- Cloud Architecture and Migration

Human Element
- Social Engineering Program Development and Support
- Security Awareness Program Development and Support

Training and Education
- Testing Administration
- Course Development and Delivery
- Staff Development and Education Management

Cyber Is In The Name

CyNtell's management team has over 50 years of cumulative experience delivering IT and cybersecurity services to the government. Our experience and past performance is primarily from providing professional services via contracts and subcontracts to DoD and military customers. Our team of professionals has proven hands-on experience and capabilities facilitating the RMF process and FISMA related compliance functions, as well as supporting the implementation and operation of IT service management. Other significant experience is from providing tactical and operational compliance services (e.g. mock audits, remediation, etc.) to various private sector small to medium sized businesses (SMB) needing to meet regulatory requirements such as HIPAA, FFEIC, SEC/FINRA, PCI-DSS, etc.

Since being established in 2016, CyNtell has achieved success by becoming a trusted provider of quality services to its customers. Our quick success is demonstrated by being awarded a multi year prime contract with the U.S. Air Force and contracting with more than a dozen SMB financial firms to provide cybersecurity policy development and process implementation.

"CyNtell's deliverables were on time, organized, and met expectations." - CCO, Rainey & Randall

OUR PROFESSIONALS

CyNtell provides staff of the highest quality, steeped in ethics, accountability, and responsibility. Our staff meets industry and government mandated training and certification requirements in IT technologies and cybersecurity standards. Our staff either holds, or is eligible to obtain, security clearance through top secret. Each of our professionals is a standards (i.e., NIST, ISO) expert in his/her area of focus. Many have contributed to the development or refinement of such standards including our CEO who directly supported (ISC)2® certifications, served in workshops for NICE, and contributed to the CERT Insider Threat Methodology .

PURPOSE STATEMENT

CyNtell was created to provide critical professional services to both the public and private sectors for the advancement and promotion of good practices in the realms of cybersecurity and IT service management. Furthermore, CyNtell's management believes that the training and education of appropriate knowledge, skills, and abilities in those realms to personnel, government staff, and the public will bolster national protection initiatives. Therefore, CyNtell is committed to providing an outlet for understanding concepts, laws, regulations, standards, and best practices in cybersecurity and IT service management.

"CyNtell is a critical resource and continues to be a pleasure to work with." - Air Force COR
